THE VOIP PROMISE: UNLEASH POWER AND PRODUCTIVITY!

If you're a small to medium sized business, you are most likely using a Key System, PBX, or Centrex services to fuel your company's telephone needs. Either way, eVoice Hosted VoIP services can be an attractive alternative for your business.

If you're interested in leveraging state-of-the-art technology to effect productivity enhancements and cost savings, consider eVoice Hosted VoIP Service. Unlike a Key System or PBX, eVoice Hosted VoIP Service requires minimal upfront capital expenses on your part, AND we offer far more features than most Key Systems or PBXs. Unlike Centrex, which is Business Phone Service hosted by your incumbent telephone company, eVoice Hosted VoIP Service provides you the ability to perform your own Moves / Adds / Changes (MAC), a savings of \$50-100 per MAC. Unlike a Key System, PBX, or Centrex, Hosted VoIP Service enables you to take advantage of features previously available only to big companies, allowing you to project a "larger-than-life" image while still operating as a small company.

MAJOR FEATURES:

The eVoice Hosted VoIP Service has more than 60 features and functions that are available to your business to make your employees more productive and responsive to customers and partners. Among these are:

- **Voice mail** – a Voice Mail box for each line or extension
- **Unified Messaging** – Forward your voice mail as a .wav file attached to an email
- **Follow Me-Find Me** - Never miss a call when working remotely
- **Business Continuity** – disaster recovery

BENEFITS

eVoice Hosted VoIP Service can provide you a total communications solution that you will never outgrow: the solution scales to your business needs, no matter your size or the number of locations. More than that, we liberate your staff from having to wrestle with obsolete hardware, arcane programming, or messy administrative tasks. In the event of a natural disaster or calamitous event, our Business Continuity solutions enables businesses to automatically re-route calls to maintain telephone service to any location and any device, including landlines phones, mobile devices and PC-based soft phones. This disaster recovery solution includes simultaneous ringing and/or sequential ringing to multiple locations, support for telecommuting and unified voice messaging and single mailbox across multiple technologies.

Lastly, because we consider it our business to provide the highest-quality, most innovative, and most effective voice technology answers to your business, we do not charge you "upgrade fees" or "maintenance charges."

Each of the EIB service is ala-carte and pay-as-you-go.

There is no major long term commitment. So pick what you need as you need it.

Scale up or scale down as your business requires.
